

To see beyond the illusion of this world
Opens the mind to the possibility of realms
Existing beyond the feeble grasp of the here
And now: to experience the abundance of the
Higher realms, is to touch upon a state of
Consciousness beyond the scope of ordinary
Perception; the extent to which it influences
One's broader outlook, determined by an
Individual's receptiveness to new information:
Unless the mind is open to explore new
Opportunities, inspiration's light will not
Penetrate the mind with its majestic rays;
As abundant thoughts act much like a
Frequency igniting the minds of those who
Seek to expand their understanding of life
Beyond the comprehension of everyday
Existence; the wisdom one attains infused with
A potential for growth, leading to transformation:
The attainment of which opens one's eyes to a
Broader range of experience; the endeavor one
Of genuine struggle, though it provides the individual
With a deeper understanding of life's mysteries.
